INSULATING GRILL JACKET with COMBO DRAWER - SPECIFICATIONS

ITEM NO. SUN3BJK, SUN4BJK, SUN5BJK

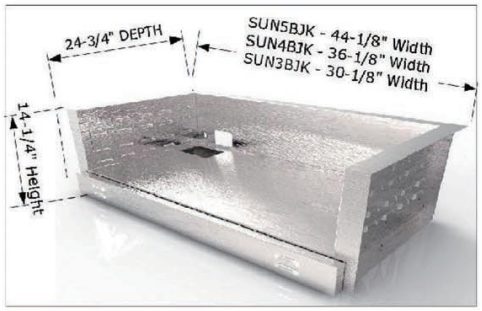

PRODUCT DESCRIPTION:

Insulating Grill Jacket offered with extra wide drawer for BBQ accessories or warming your bread buns using the radiant heat from grill. Design is Self-Rimming for a clean installed look and well polished. Jacket provides adequate heat reduction to surrounding island structure while simultaneously increasing air flow to burners and reducing flame disbursement with the insulating sleeve.

WARNING: Do Not store Combustable materials in Grill Jacket Bottom Drawer, including Gas Lighter, Paper Towels, Food Items, Brickets, Wood Chips, and etc. *Items may catch fire or explode.*

INSULATING GRILL JACKET with COMBO DRAWER INSTALLATION INSTRUCTIONS

ITEM NO. SUN3BJK, SUN4BJK, SUN5BJK

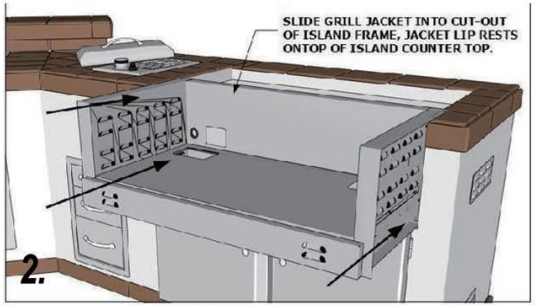

Read these instructions carefully before installing the Grill Jacket.

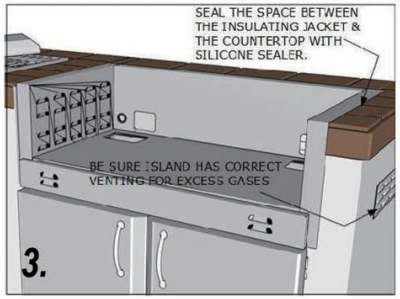

STEP 1. Insure island meets the CUT-OUT requirments shown in illustration on right. For the Grill Jacket, because of the extra height in bottom drawer, if you are installing access doors below grill, island must be a minimum of 36" Height - to allow for proper framing. Depending on framing type used, island height may change by a variable of 2"-3" additionaly.

⚠ *WARNING: Never build Shelf or inclose space under Grill Jacket. Jacket is meant to free hang, supported by the island top counter.*

STEP 2. Slide Grill Jacket into provided CUT-OUT, Jacket is supported by top flange, which extends approximatly 1" additionally beyond CUT-OUT of island frame.

STEP 2 & 3. Slide Grill Jacket into provided CUT-OUT of island frame.

STEP 4. While sliding BBQ Grill into Jacket sleeve, first hook up gas lines, and connect any required electrical connections. Refer to the grill manual for gas supply hook-ups and installation. Finally push grill into sleeve so it fits tight.

⚠ *ATTENTION: Refer to the grill safety precautions and installations to install the grill and for special propane and natural gas venting requirements. Grill Jacket is most commonly used when building your island with combustable materials, Sunstone Grills does not recomend the use of such materails in the construction of your island. If your island is constructed of any materials as such, you are required to use a Grill Jacket on installation. Sunstone Grills Company and it's affialates are not responsible or held liable from misuse of this product, or incorrect installation that results in damage or injury of any kind.*
